### Experiment Overview

| Setting    | Value              |
|------------|--------------------|
| Checkpoint | novaAnimeXL_iLV190 |
| Sampler    | Euler a            |
| Scheduler  | Automatic          |
| Steps      | 20                 |
| CFG        | 4.5                |
| Size       | 1024x1024          |

### Conditions

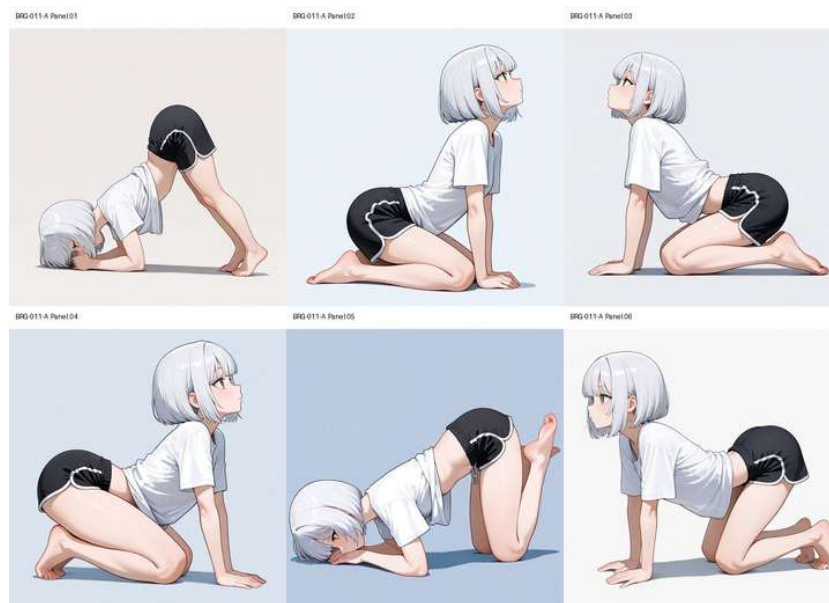

| Run       | Condition   | Unique prompt phrase                                                            | Seed       | Status   |
|-----------|-------------|---------------------------------------------------------------------------------|------------|----------|
| BRG-011-A | Condition A | arm support                                                                     | 4118611934 | OBSERVED |
| BRG-011-B | Condition B | hips raised, arms supporting body, feet flat on floor                           | 2727360919 | OBSERVED |
| BRG-011-C | Condition C | bridge pose, body bridge, hips raised, arms supporting body, feet flat on floor | 104309902  | OBSERVED |

# BRG-011-A

Condition: Condition A

Status: OBSERVED

Unique prompt phrase: arm support

## Positive Prompt

1girl, silver hair, bob cut, plain oversized white t-shirt, black shorts, simple background, full body, side view, face up, knees bent, feet planted, arched back, arm support, chest lifted, weight on hands and feet

## Computed Aggregate

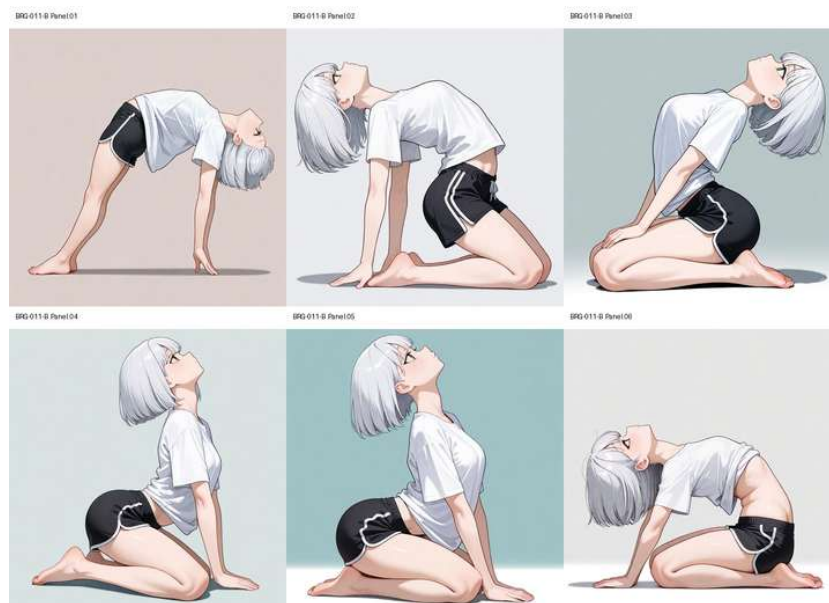

| Metric                        | Counts                                                         |

# Observation Boundaries

Visual artifacts and observed morphologies are image observations. Prompt / Concept Leakage is a separate research-stage assessment.

| Run       | Uncertain                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Visual Artifacts        | Prompt / Concept Leakage | Primary Morphologies                                                               | Secondary Morphologies                                                               |

# BRG-011 Result Review

Review status: **NEEDS\_FOLLOWUP** equivalent

Scope: image-to-observation consistency and readiness for later research interpretation. No canonical observation values were changed by this review.

## Findings

**1. BRG-011-C Panel 2 - hand load requires recheck.**

The image directly shows both hands grasping the feet, but it does not directly establish that the hands support the pose. The current contact\_load value is supporting. Under the rubric rule that separates contact from load, unclear is the safer candidate unless additional visible evidence supports the load assignment.

**2. BRG-011-C Panel 1 - torso\_arch may be overstated.**

Most visible extension is localized to the head and neck while the torso remains comparatively close to vertical. The current torso\_arch value is strong. Weak or medium should be rechecked independently from head\_orientation. Any change requires regeneration of computed\_aggregate.

## Observed Comparison

| Run       | Observed primary morphology counts                                 |
|-----------|--------------------------------------------------------------------|
| BRG-011-A | kneeling_hand_support 3/6; prone_quadraped 2/6; quadraped_pose 1/6 |
| BRG-011-B | kneeling_backbend 5/6; wheel_like 1/6                              |
| BRG-011-C | wheel_like 3/6; kneeling_backbend 2/6; prone_quadraped 1/6         |

Descriptive result: BRG-011-C contains the highest observed wheel\_like count. This is an observation-level comparison, not a finalized Working Conclusion.

## Disposition

BRG-011-A and BRG-011-B are suitable for handoff at the current observation level. BRG-011-C should receive a focused recheck of the two findings above before the grouped result is accepted for Working Conclusion. The canonical research-review.md files remain unset.
